Date	24 June 2026
Team ID	
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	GitHub Repository Link
Programming Language(s)	Python, JavaScript
Framework(s) Used	FastAPI, React.js
Database	SQLite, SQLAlchemy ORM
AI Integration	Google Gemini API
Key Features Implemented	User Authentication, Loan Management, AI Settlement Recommendation, Financial Health Analysis, Negotiation Letter Generation, Dashboard Analytics
Pending / Future Features	Multi-language Support, Email Notifications, Payment Gateway Integration
Setup / Run Instructions	Clone repository, install dependencies, configure Gemini API key, initialize SQLite database, run FastAPI backend and React frontend

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized	Yes
2	Meaningful variable and function names	Yes
3	Comments included	Yes
4	Error handling implemented	Yes
5	Input validation	Yes
6	Optimized database operations	Yes
7	Gemini API integration	Yes
8	REST APIs tested	Yes
9	Application runs without critical errors	Yes
10	Version control used	Yes

Additional Notes / Comments:

The project uses React.js, FastAPI, Python, SQLite, SQLAlchemy ORM and Google Gemini AI. It follows a modular architecture and meets the required functionality.
