

Project Executable Files

Date	30 June 2026
Team ID	
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	3 Marks

Project Executable Files

This section contains all the executable and deployable files required to run the **AI Powered Debt Relief & Financial Recovery Platform**. The project includes the complete source code, frontend, backend, database configuration, AI integration, and setup instructions to enable the evaluator to run the application successfully.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (Frontend & Backend)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json	Yes
4	Database (SQLite)	Yes
5	Environment Configuration (.env.example)	Yes
6	Deployed Application URL (if hosted)	Yes
7	Executable Build / Production Build	N/A
8	Dockerfile / Container Configuration	No
9	Test Files & Test Results	Yes
10	Demo Video / Project Walkthrough	Yes

Step 2: File / Folder Structure

AI-Powered-Debt-Relief-Platform

```
|
|
|— frontend/
|   |
|   |— src/
|   |
|   |— public/
|   |
|   |— package.json
|   |
|   └─ vite.config.js
|
|
|— backend/
|   |
|   |— app/
|   |
|   |— models/
|   |
|   |— routes/
|   |
|   |— services/
|   |
|   |— database.py
|   |
|   |— main.py
|   |
|   |— requirements.txt
|   |
|   └─ .env
|
|
|— database/
|   └─ debt_relief.db
|
|
|— README.md
|— .gitignore
└─ screenshots/
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://ai-powered-debt-relief-financial-re-nine.vercel.app/login
Login Credentials (Demo)	Login Required
Platform / Hosting Provider	Vercel
Repository Link	https://github.com/swarnarajugovindalapudi/AI-Powered-Debt-Relief-Financial-Recovery-Platform
Demo Video Link	https://drive.google.com/file/d/1XmpdREuTPhrQvwoSBWCkbOdBaH6RtM0t/view?usp=drivesdk

Step 4: Run Instructions

Prerequisites

- Python 3.10 or above
- Node.js 18+
- npm
- Internet Connection
- Google Gemini API Key

Step 1

Clone the repository from GitHub.

```
git clone <repository-url>
```

Step 2

Navigate to the backend folder and install Python dependencies.

```
pip install -r requirements.txt
```

Step 3

Configure the .env file by adding your Google Gemini API key.

```
GEMINI_API_KEY=your_api_key
```

Step 4

Run the FastAPI backend server.

```
uvicorn main:app --reload
```

Step 5

Navigate to the frontend folder and install dependencies.

```
npm install
```

Step 6

Start the React development server.

```
npm run dev
```

Step 7

Open the application in your browser.

<http://localhost:5173>

Step 8

Login, add loan details, perform financial analysis, generate AI settlement recommendations, and use the AI Letter and Negotiation Strategy modules.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Internet connection required for AI features	Active
2	Google Gemini API response time may vary	Normal AI behavior
3	AI analysis depends on the quality of user-provided financial data	Expected behavior
4	SQLite is suitable for development and small-scale deployments	Upgrade to MySQL/PostgreSQL for production
5	Response time may slightly increase during high traffic	Can be improved through cloud scaling
