Project Title	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to simplify debt management and financial recovery through Artificial Intelligence by providing personalized debt settlement recommendations, financial health analysis, AI-generated negotiation letters, loan management, and borrower guidance. The solution improves financial decision-making, reduces debt stress, and enhances financial recovery using Google Gemini AI.

Project Overview	
Objective	The primary objective of the AI Powered Debt Relief & Financial Recovery Platform is to provide an AI-powered financial assistance system that helps borrowers manage loan details, analyze financial health, generate debt settlement recommendations, create negotiation letters, and receive personalized financial recovery guidance.
Scope	The project focuses on improving debt management and financial recovery through Artificial Intelligence by providing loan analysis, financial health tracking, AI-powered settlement recommendations, intelligent negotiation letter generation, and personalized borrower assistance.
Problem Statement	
Description	Borrowers often face difficulties in managing multiple loans, understanding their financial condition, negotiating with lenders, and selecting suitable debt settlement options. Traditional debt management methods are time-consuming, require financial expertise, and do not provide personalized guidance for financial recovery.
Impact	These challenges increase financial stress, delay loan settlements, reduce repayment efficiency, and negatively affect borrowers' financial stability. Addressing these issues through Artificial Intelligence can improve financial planning, automate settlement recommendations, simplify lender negotiations, and enhance overall financial recovery.
Proposed Solution	

Approach	The solution uses Google Gemini AI, FastAPI, React.js, Python, SQLite, and SQLAlchemy ORM to deliver intelligent financial assistance through debt settlement recommendations, financial health analysis, AI-generated negotiation letters, loan management, and personalized borrower guidance.
Key Features	- AI-powered Debt Settlement Recommendation - Financial Health Analysis - Loan Management System - Debt Stress Analysis - Monthly EMI Ratio Calculation - AI-generated Negotiation Letter Generation - Settlement Percentage Analysis - Financial Dashboard - Borrower Guidance and Recovery Insights - Secure User Authentication

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	Intel/AMD Processor, Multi-Core CPU
Memory	RAM specifications	8 GB
Storage	Disk space for data, models, and logs	256 GB SSD
Software		
Frameworks	Python frameworks	FastAPI, React.js
Libraries	Additional libraries	google-generativeai, SQLAlchemy, requests, python-dotenv
Development Environment	IDE	Python, HTML, CSS, JavaScript
Data		
Data	Source, size, format	Borrower financial data, loan details, SQLite Database, Google Gemini API
