

Solution Requirements

Date	10 June 2026
Team ID	
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	Borrowers can securely register and log in to access their financial dashboard and loan information.	High
2	Authorization levels	Users can manage loan details, view financial health reports, generate negotiation letters, and receive AI recommendations based on their account permissions.	High

3	External interfaces	The system integrates with the Google Gemini API to generate AI-powered settlement recommendations, negotiation letters, and financial guidance.	High
---	---------------------	---	------

4	Transactions processing	Processes borrower loan information, EMI details, debt analysis, and AI-generated financial recommendations efficiently.	High
5	Reporting	Generates financial health reports, debt stress analysis, settlement recommendations, and negotiation history.	High
6	Business rules, etc.	Provides personalized settlement strategies based on the borrower's income, loan amount, overdue duration, and repayment capability.	Medium
7	Compliance to laws or regulations	Ensures secure handling of borrower financial data and maintains user privacy according to applicable data protection standards.	Medium
8	Other	Supports AI-assisted financial recovery, loan management, and intelligent borrower guidance.	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
------	--------------	-------------------------	-------------------------------------

1	Performance & Speed	Generates AI recommendations and financial analysis quickly.	Response within 3 seconds.
2	Scalability	Supports multiple borrowers using the platform simultaneously.	Supports 1000+ concurrent users.
3	Security & Data Privacy	Protects borrower information and financial records using secure authentication and encrypted data storage.	Secure authentication and encrypted database.
4	Reliability & Availability	Ensures continuous availability of the application with minimal downtime.	99% system uptime.
5	Usability & Accessibility	Provides an intuitive, responsive, and user-friendly interface accessible on different devices.	Compatible with desktop and mobile browsers.
6	Maintainability	Supports modular architecture for easy maintenance, feature updates, and future enhancements.	Modular and scalable codebase.
